1. Company/Client Background

Koperasi Kakitangan Daerah Kelantan Berhad (KKK) is a cooperative in Malaysia established to provide financial and social services to the employees of the Lembaga Kemajuan Pertanian Kemubu (KADA) and its members. The cooperative plays an important role in enhancing the economic well-being of its members through services such as savings, loan facilities and share offerings, exemplifying the principles of member ownership, democratic control and mutual benefit.

2. Problem Background

Currently, the cooperative uses a manual system for key processes such as new member registration, loan applications, and applications approval. Applicants must fill in physical member application forms and loan application forms, whereas the cooperative staff manually verify and check the eligibility of the information provided. After the meeting of the Board of Directors, the cooperative staffs inform the applicants about their application result. Figure 1, Figure 2, and Figure 3 are some of the physical forms and documents currently in use by the cooperative.

Figure 1: Member Application Form

The form is titled "PERMOHONAN MENJADI ANGGOTA" (Application to become a member). It contains fields for personal information (Nama, NIK, Taraf Perkahwinan, Alamat Rumah, No. Anggota, No. PF, Jawatan & Gred, Alamat Pejabat), contact details (Poskod, Negeri, No. Tel/Fax, No. Tel Bimbit, No. Tel Rumah), gender (Jantina: Lelaki or Perempuan), religion (Agama: Islam or Lain-lain), and ethnicity (Bangsa: Melayu or Lain-lain). There is also a section for dependents (Hubungan, Nama, No. K/P @ No. SRT Beranak). At the bottom, there is a table for fees (Perkara, RM) and a note about modal syer deposits.

BIL	PERKARA	RM
1	FEE MASUK	
2	MODAL SYER *	
3	MODAL YURAN	
4	WANG DEPOSIT ANGGOTA	
5	SUMBANGAN TABUNG KEBAIJAKAN (AL-ABRAR)	
6	SIMPANAN TETAP	
7	LAIN-LAIN	

* AMBIL MODAL SYER ADALAH SEBALIKNYA RM 300.00 DAN TIDAK MELEBIH 1/3 DARIPADA MODAL SYER KOPERASI DAN HINDARILAH DISELAKUAN DALAM TEMPIM 8 BULAN DARI TARAH KELULUSAN MENJADI ANGGOTA.

The manual system faced challenges such as the low work efficiency, high possibility of manual errors, information backup difficulties, and potential issues with data integrity. Therefore, the cooperative requires an automated system to address these problems.

3. Proposed Solution

The proposed system, namely “KKK Online System” will replace the manual processes with a digital platform and transform key operations like member registration, loan applications, and financial reporting.

4. Development Approach

Waterfall model is implemented to the project as it is easy to manage where it allows for a structured, sequential approach where each phase has specific deliverables before moving to the next. This ensures a well-documented and systematic development process.

Analysis Phase

In this phase, the main focus is on collecting both functional and non-functional requirements for the system. The process begins with an online meeting session between Encik Ahmad from the cooperative and all members to define the system scope and objectives. During this discussion, we identify the main features of the system, such as member application, loan application and financial report.

After the discussion, some other necessary information is obtained through WhatsApp group discussion with the cooperative. Based on the discussion, we prepare a software requirements specification (SRS), which details all functional requirements and non-functional requirements. Use case diagrams, class diagrams, Entity-Relationship Diagrams and other various UML diagrams are created to visually represent system interactions and data processing flows, aiding the stakeholder in understanding the proposed system structure. These deliverables form the basis of the following design phases.

Design Phase

This phase consists of two main components: High-Level Design (HLD) and Low-Level Design (LLD). HLD provides an overview of the system architecture, outlining the various components, including software interfaces and user interactions.

Following the HLD, we move into the LLD phase, which focuses on the specific details of each module within the system. This phase includes defining the logic algorithms, data structures and interfaces required for implementation, serving as a blueprint for developers. A prototype is created by Figma and the database is designed. By the end of this, we aim to deliver a set of documentation, including system architecture diagram and UI prototypes as a guideline to proceed into implementation.

Implementation Phase

This phase begins by setting up the localhost environment and establishing version control to manage code changes and collaboration effectively.

Each of our team members are responsible for one or two modules, working on the different modules. However, throughout the process, there are minor requirement changes that require rework on our program which are not documented in the SDD.

By the end of this phase, the key deliverables include working modules for member registration, loan management, a fully functioning database and successful integration of front-end and back-end systems.

Testing Phase

It focuses on the correctness and completeness of the system which begins with testing login and main page display for accuracy and proper functionality. Then, our team proceeds with integration testing to make sure that different system components such as loan management and loan repayment tracking are working together seamlessly.

Additionally, User Acceptance Testing (UAT) should be carried out, where a select group of users tests the system and provides feedback on its performance and usability. However, due to time constraints we are only able to demonstrate part of the system to the client. From the session, the client gave us some feedback and other requirements that we need to include to our system.

The deliverables from this phase include detailed test reports documenting the testing process and bug reports highlighting any issues found during the testing to help further refine the system.

5. Development Software, Language, Technology, API and Tools

The development software used are VSCode and XAMPP. VSCode is used to write and edit the code while XAMPP is the local server environment used to run and test the system.

The languages used to develop the system include HTML, CSS, SQL, PHP and JavaScript.

The technologies used include MySQL, Jimat Hosting, and AJAX. MySQL is the DBMS used to store the data, while Infinity Hosting is used to host the application for free online. AJAX can make requests without reloading, allowing dynamic content loading.

Other tools include SweetAlert, Font Awesome and Bootswatch. These tools greatly improve the User Experience by making the website more appealing and more easy to use.

- SweetAlert can substitute windows alerts and make the alert more appealing.
- Font Awesome provides a library of icons to add to buttons.
- Bootswatch provides basic styling and ensures consistency in design throughout the website. The "Litera" theme is used for the system.

6. Function/Module Explanation

1. Apply Membership

The employees in KADA can apply to be a member of the KKK by filling in the online form. Once their application is approved, the user will be given a temporary password via email to log in to the system.

2. Login

The cooperative member and the administrator can log in the system by using the correct login credentials. The members will then be directed to the member's page and the administrator will be directed to the administrator's page.

3. Apply Loan

The cooperative members can apply for financing services from the cooperative by filling in the online form and upload any required documents. Upon submission, they would be able to see their application status through the system.

4. Update User Profile

The cooperative members can update their user personal information, and the family and inheritor information.

5. View Financial Status

Upon log in to the system, the cooperative member would be able to view their financial status including the share information (Maklumat Saham Ahli), the loan information (Maklumat Pinjaman Ahli), and the transaction histories.

6. View List

The administrator would be able to view the list of membership and loan applications as well as the existing members and borrowers. Besides, the admin would be able to update the status of the membership and loan application.

7. Generate Report

The admin can generate monthly and annual reports that summarise the financial and membership information.

8. Manage System

This use case includes various administrative tasks, including recording transactions, updating policies, and updating banners.

After a transaction settled between the stakeholders, the admin would update the transaction in the system to reflect the transaction in the member profile. This includes updating the amount of share capital, funds, contributions and loans.

The administrator would be able to update policies such as the minimum membership, minimum share capital requirement for loan application, loan interest rate, maximum loan repayment duration and maximum financing amount.

The administrator can update the website banner. This ensures the sustainability of the system.

7. System Credentials (Hosting)

User Type	User ID	Password	Information that required for forgot password

	12345679	123456	-	-

8. Localhost Setup

To setup the KKK Online System on a local environment, XAMPP that contains Apache, MySQL, and PHP needs to be downloaded. After installing, start Apache and MySQL services. Next, place KKK Online System files in the htdocs directory.

Next, create a database in phpMyAdmin and start defining tables and its attributes. After that, update the db_connect file with localhost, root, password, and database name.

Finally, launch the KKK Online System in the browser by navigating to the localhost/KKK-System/. If any error occurs, check for the database connection issues, missing extensions, or incorrect file paths. After successfully setting up the local host, users can login to the system and interact with the KKK Online System.

Member Membership Termination Page

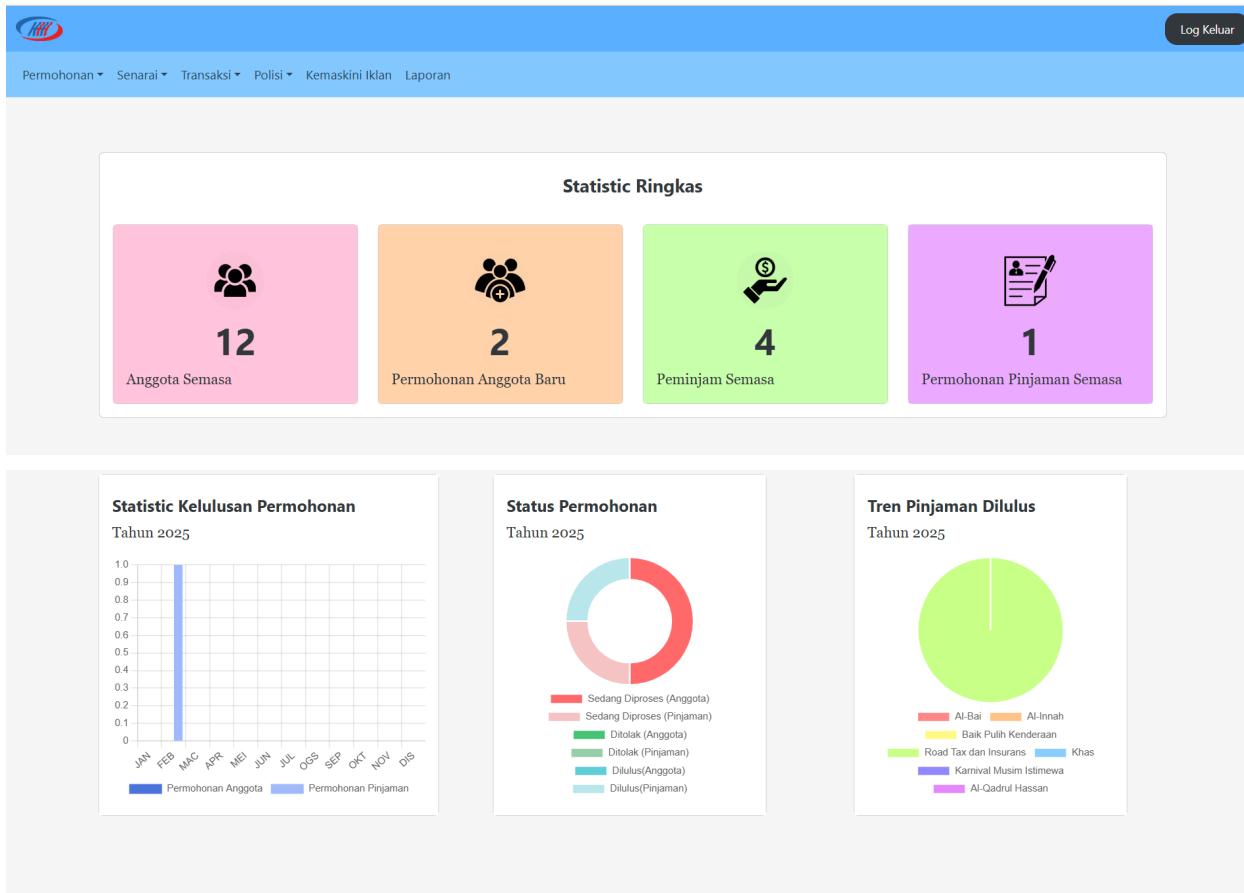

The screenshot shows a web application for membership termination. At the top, there is a blue header bar with the logo 'KKK' on the left and navigation links: Laman Utama, Profil, Pinjaman, Maklum Balas, Berhenti Menjadi Anggota, and Log Keluar. The main title 'Permohonan Berhenti Menjadi Anggota' is centered above a form. The form fields include 'No. Anggota' (1003), 'Nama' (Lam Kin Xin), and 'Sebab Berhenti Menjadi Anggota' (a large text area). Below the form are two buttons: 'Kembali' and 'Hantar'. At the bottom of the page, there are three columns: 'ALAMAT' (Address of D/A Lembaga Kemajuan Pertanian Kemubu, Peti Surat 127, Bandar Kota Bharu, 15710 Kota Bharu, Kelantan), 'HUBUNGI KAMI' (Contact information: Telefon: 09-7447088, Email: koperasi_kada@yahoo.com), and 'WAKTU OPERASI' (Operating hours: Ahad - Rabu: 08:00 - 17:00, Khamis: 08:00 - 15:30, Jumaat: Rehat, Sabtu: Rehat). A copyright notice 'Hak Cipta © 2025 KKK. Semua Hak Terpelihara.' is at the very bottom.

Member Track Membership Termination Status Page

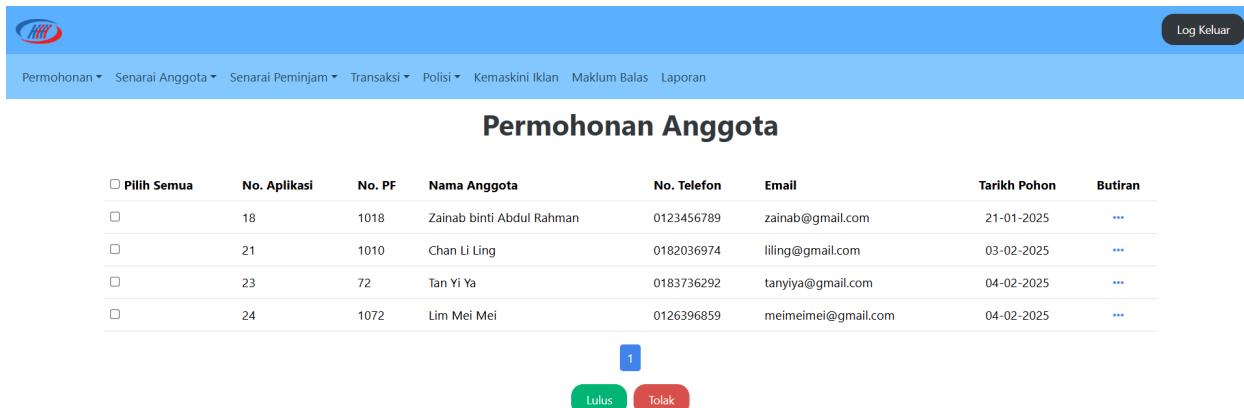

The screenshot shows a web application for tracking membership termination applications. At the top, there is a blue header bar with the logo 'KKK' on the left and navigation links: Laman Utama, Profil, Pinjaman, Maklum Balas, Berhenti Menjadi Anggota, and Log Keluar. The main title 'Status Permohonan Berhenti Menjadi Anggota' is centered above a table. The table has four columns: 'ID', 'Tarikh Hantar', 'Status', and 'Ulasan'. The data shows two rows: ID 2 (Tarikh Hantar: 24-01-2025 18:53:18, Status: Sedang Diproses) and ID 1 (Tarikh Hantar: 24-01-2025 18:52:09, Status: Sedang Diproses). At the bottom of the page, there are three columns: 'ALAMAT' (Address of D/A Lembaga Kemajuan Pertanian Kemubu, Peti Surat 127, Bandar Kota Bharu, 15710 Kota Bharu, Kelantan), 'HUBUNGI KAMI' (Contact information: Telefon: 09-7447088, Email: koperasi_kada@yahoo.com), and 'WAKTU OPERASI' (Operating hours: Ahad - Rabu: 08:00 - 17:00, Khamis: 08:00 - 15:30, Jumaat: Rehat, Sabtu: Rehat). A copyright notice 'Hak Cipta © 2025 KKK. Semua Hak Terpelihara.' is at the very bottom.

Admin Manage Current Member Page

The screenshot shows a web application interface for managing members. At the top, there is a blue header bar with the logo on the left and 'Log Keluar' on the right. Below the header, a navigation bar includes links for Permohonan, Senarai Anggota, Senarai Peminjam, Transaksi, Polisi, Kemaskini Iklan, Maklum Balas, and Laporan. The main content area is titled 'Senarai Anggota Semasa' (Current Member List). It features a table with columns: No. Anggota, No. PF, Nama Anggota, No. Telefon, Email, Status, Tarikh Masuk, Butiran, and Tindakan. The table contains 10 rows of member data. A search bar at the top right allows users to search for specific members. Each row includes a 'Status' column with a dropdown menu and a 'Tindakan' column with a dropdown menu. Navigation buttons at the bottom indicate page 1 of 2.

Admin View Feedback List Page

The screenshot shows a top navigation bar with a logo on the left, followed by links for 'Permohonan', 'Senarai', 'Transaksi', 'Polisi', 'Kemaskini Iklan', and 'Laporan'. On the right side of the bar is a 'Log Keluar' button. Below the bar, the main content area has a title 'Senarai Maklum Balas' (Feedback List). Underneath the title are two dropdown menus: one for 'Jenis' (Type) and another for 'Status'. A blue 'Tapis' (Filter) button is positioned next to the status dropdown. Below these controls is a table with five columns: 'ID', 'Jenis', 'Status', 'Tarikh Hantar', and 'Butiran'. The table contains two rows of data. The first row, with ID 2, has 'Masalah' in 'Jenis', 'Sedang Diproses' in 'Status', and '24-01-2025 12:37:38' in 'Tarikh Hantar'. The second row, with ID 1, has 'Cadangan' in 'Jenis', 'Diterima' in 'Status', and '24-01-2025 12:37:30' in 'Tarikh Hantar'. Each row has a three-dot menu icon ('...') at the end of the 'Butiran' column.

Admin Update Member Application Policy Page

The screenshot shows a web application interface for managing member application policies. At the top, there is a blue header bar with a logo on the left and a "Log Keluar" button on the right. Below the header, a navigation menu includes "Permohonan", "Senarai", "Transaksi", "Polisi", "Kemaskini Iklan", and "Laporan". The main content area has a title "Kemaskini Polisi Asas Pemohonan Anggota". Below the title, there are several input fields for different fees:

- Fee Masuk: RM 50 .00
- Fee Masuk Anggota yang Pernah Menjadi Anggota: RM 100 .00
- Modah Syer Minimum: RM 300 .00
- Modal Yuran Minimum: RM 35 .00
- Wang Deposit Anggota Minimum: RM 0 .00
- Sumbangan Tabung Kebajikan Minimum: RM 5 .00
- Simpanan Tetap Minimum: RM 5 .00
- Lain-lain: RM 0 .00

At the bottom center of the form are two buttons: "Kembali" (Back) and "Kemaskini" (Update).

1. Permohonan Keahlian:
 - Kadar kelulusan keahlian adalah 0.0%
 - Jumlah 2 permohonan baharu telah diterima
2. Permohonan Pinjaman:
 - Kadar kelulusan pinjaman adalah 0.0%
 - Jumlah nilai pinjaman yang diluluskan: RM 5,000.00
3. Cadangan:
 - Meningkatkan proses kelulusan keahlian
 - Mengkaji semula kriteria kelayakan pinjaman
 - Mengkaji semula strategi pengurusan kewangan
 - Memantau prestasi kewangan secara berterusan
 - Mengekalkan polisi yang sedia ada untuk kestabilan operasi

10. Alpha and Beta Testing Reports

Acceptance testing is important to ensure that the system developed fits the user needs and requirements. It also ensures that the business logic implemented is accurate. The testing covers the testing of the functionality, usability, performance and security aspects. Alpha testing should be conducted with the client in the developer site to give feedback to the developers. The client can give feedback to the developers directly and make changes. Beta testing involves testing that makes the system to some user to experiment at their site and to raise problems to the system developers. The following is the Equivalence Partitioning and Boundary Value Analysis and the test data.

Equivalence Partitioning and Boundary Value Analysis

Object 1: Member Application

Object 10: Banner

Object Class	Attributes	Equivalence Partition and Input Range	
		Equivalence Classes	Boundary Value

Banner	b_name	Valid: “Advertisement”	Minimum: “A” Maximum length: 255 characters
	b_banner	Valid: Filetype = .png, .jpg, .jpeg	Minimum: 1 photo
		Valid: Filetype except = .png, .jpg, .jpeg	Maximum: 5MB

Test Data

Case No.	Equivalence Class	Representative (BVA)	Expected Result
TC001_01	Valid m_name	Name consists of alphabet and symbols such as “/”, “””, “@” and “ “ Example input: “Ali bin Abu”	System accept the name
TC001_02	Invalid m_name	Name consists of number Example input: “1234”	System reject the name
TC002_01	Valid m_ic	Numbers with format of “xxxxxx-xx-xxxx” Example input: “040605-10-1587”	System accept the ic
TC002_02	Invalid m_ic	Numbers that does not follow the format of “xxxxxx-xx-xxxx” Example input: “040605101587”	System reject the ic
TC002_03		Alphabet Example input: “ABC”	
TC003_01	Valid m_email	Valid: Email that consists of “@” and	System accept the email

		<p>“.com”</p> <p>Example input: “tanmeiling@gmail.com”</p>	
TC003_02	Invalid m_email	<p>Invalid:</p> <p>Email that does not consists of “@” or “.com”</p> <p>Example input: “User123.com”</p>	System reject the email
TC004_01	Valid m_gender	<p>Valid:</p> <p>Values from the available radio button</p> <p>1: Lelaki 2: Perempuan</p> <p>Example input: “1”</p>	System accept the gender
TC005_01	Valid m_religion	<p>Valid:</p> <p>Values from the available radio button</p> <p>1: Islam 2: Buddha 3: Hindu 4: Kristian 5: Lain-lain</p> <p>Example input: “1”</p>	System accept the religion
TC006_01	Valid m_race	<p>Valid:</p> <p>Values from the available radio button</p> <p>1: Melayu 2: Cina 3: India 4: Lain-lain</p> <p>Example input: “1”</p>	System accept the race
TC007_01	Valid m_maritalStatus	<p>Valid:</p> <p>Values from the available radio button</p> <p>1: Bujang</p>	System accept the marital status

		<p>2: Kahwin 3: Cerai 4: Kematian Pasangan</p> <p>Example input: “1”</p>	
TC008_01	Valid m_homeAddress	<p>Valid: Mixture of alphabets, numbers, and special characters</p> <p>Example input: “10, Jalan Ali”</p>	System accept the home address
TC009_01	Valid m_homeCity	<p>Valid: Alphabet</p> <p>Example input: “Ipoh”</p>	System accept the home city
TC009_02	Invalid m_homeCity	<p>Invalid: Number</p> <p>Example input: “123”</p>	System reject the home city
TC009_03		<p>Invalid: Special character</p> <p>Example input: “Johor @ Bahru”</p>	
TC010_01	Valid m_homeState	<p>Valid: Values from the available radio button</p> <p>1: Johor 2: Kedah 3: Kelantan 4: Melaka 5: Negeri Sembilan 6: Pahang 7: Pulau Pinang 8: Sabah 9: Sarawak 10: Selangor 11: Terengganu 12: WP Kuala Lumpur</p>	System accept the home state

		<p>13: WP Labuan 14: WP Putrajaya 15: Perak 16: Perlis</p> <p>Example input: “1”</p>	
TC011_01	Valid m_homePostcode	<p>Valid: 5 numbers</p> <p>Example input: “36000”</p>	System accept the home postcode
TC011_02	Invalid m_homePostcode	<p>Invalid: Value consisting alphabet, number, or special characters</p> <p>Example input: “3@a0”</p>	System reject the home postcode
TC012_01	Valid m_position	<p>Valid: Alphabet</p> <p>Example input: “Kerani”</p>	System accept the position
TC013_01	Valid m_positionGrade	<p>Valid: Number</p> <p>Example input: “A23”</p>	System accept the position grade
TC014_01	Valid m_pfNo	<p>Valid: Number</p> <p>Example input: “1001”</p>	System accept the pf number
TC014_02	Invalid m_pfNo	<p>Invalid: Negative number or decimal, or alphabet</p> <p>Example input: “-1@a8.6”</p>	System reject the pf number
TC015_01	Valid m_pfNo	Valid:	System accept the

		Number Example input: “1001”	pf number
TC015_02	Invalid m_pfNo	Invalid: Negative number or decimal, or alphabet Example input: “-1@a8.6”	System reject the pf number
TC016_01	Valid m_officeAddress	Valid: Mixture of alphabets, numbers, and special characters Example input: “10, Jalan Ali”	System accept the office address
TC017_01	Valid m_officeCity	Valid: Alphabet Example input: “Ipoh”	System accept the office city
TC017_02	Invalid m_officeCity	Invalid: Number Example input: “123”	System reject the office city
TC017_03		Invalid: Special character Example input: “Johor @ Bahru”	
TC018_01	Valid m_officeState	Valid: Values from the available radio button 1: Johor 2: Kedah 3: Kelantan 4: Melaka 5: Negeri Sembilan 6: Pahang 7: Pulau Pinang	System accept the office state

		<p>8: Sabah 9: Sarawak 10: Selangor 11: Terengganu 12: WP Kuala Lumpur 13: WP Labuan 14: WP Putrajaya 15: Perak 16: Perlis</p> <p>Example input: “1”</p>	
TC019_01	Valid m_officePostcode	<p>Valid: 5 numbers</p> <p>Example input: “36000”</p>	System accept the office postcode
TC019_02	Invalid m_officePostcode	<p>Invalid: Value consisting alphabet, number, or special characters</p> <p>Example input: “3@a0”</p>	System reject the office postcode
TC020_01	Valid m_faxNumber	<p>Valid: Number</p> <p>Example input: “12345678901”</p>	System accept the fax number
TC020_02	Invalid m_faxNumber	<p>Invalid: Alphabet</p> <p>Example input: “abc”</p>	System reject the fax number
TC021_01	Valid m_phoneNumber	<p>Valid: Number</p> <p>Example input: “12345678901”</p>	System accept the phone number
TC021_02	Invalid m_phoneNumber	<p>Invalid: Alphabet</p>	System reject the phone number

		Example input: “abc”	
TC022_01	Valid m_homeNumber	Valid: Number Example input: “123456789”	System accept the home number
TC022_02	Invalid m_homeNumber	Invalid: Alphabet Example input: “abc”	System reject the home number
TC023_01	Valid m_monthlySalary	Valid: Positive number or decimal Example input: “3500.50”	System accept the monthly salary
TC023_02	Invalid m_monthlySalary	Invalid: Alphabet or negative number or decimal Example input: “-321a.60”	System reject the monthly salary

Case No.	Equivalence Class	Representative (BVA)	Expected Result
TC024_01	Valid h_name	Valid: Name consists of alphabet and symbols such as “/”, “””, “@” and “ “ Example input: “Ali bin Abu”	System accept the heir name
TC024_02	Invalid h_name	Invalid: Name consists of number Example input: “1234”	System reject the heir name
TC025_01	Valid	Valid:	System accept the

	h_relationWithMember	Values from the available selections 1: Suami Isteri 2: Anak 3: Keturunan 4: Orang Tua 5: Saudara kandung 6: Lain-lain Example input: “1”	heir relation with member
TC026_01	Valid h_ic	Valid: Numbers with format of “xxxxxxxx-xx-xxxx” Example input: “040605-10-1587”	System accept the heir ic
TC026_02	Invalid h_ic	Invalid: Numbers that does not follow the format of “xxxxxxxx-xx-xxxx” Example input: “040605101587”	System reject the heir ic
TC026_03		Invalid: Alphabet Example input: “ABC”	

Case No.	Equivalence Class	Representative (BVA)	Expected Result
TC027_01	Valid m_feeMasuk	Valid: Positive decimal Example input: “35.50”	System accept the m_feeMasuk
TC027_02	Invalid m_feeMasuk	Invalid: Negative decimal or alphabet	System reject the m_feeMasuk

		Example input: “-10a.50”	
TC028_01	Valid m_modalSyer	Valid: Positive decimal Example input: “35.50”	System accept the m_modalSyer
TC028_02	Invalid m_modalSyer	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the m_modalSyer
TC029_01	Valid m_modalYuran	Valid: Positive decimal Example input: “35.50”	System accept the m_modalYuran
TC029_02	Invalid m_modalYuran	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the m_modalYuran
TC030_01	Valid m_deposit	Valid: Positive decimal Example input: “35.50”	System accept the m_deposit
TC030_02	Invalid m_deposit	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the m_deposit
TC031_01	Valid m_alAbrar	Valid: Positive decimal Example input: “35.50”	System accept the m_alAbrar
TC032_02	Invalid m_alAbrar	Invalid: Negative decimal or alphabet	System reject the m_alAbrar

		Example input: “-10a.50”	
TC033_01	Valid m_simpananTetap	Valid: Positive decimal Example input: “35.50”	System accept the m_simpananTetap
TC033_02	Invalid m_simpananTetap	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the m_simpananTetap
TC034_01	Valid m_feeLain	Valid: Positive decimal Example input: “35.50”	System accept the m_feeLain
TC034_02	Invalid m_feeLain	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the m_feeLain

Case No.	Equivalence Class	Representative (BVA)	Expected Result
TC035_01	Valid m_email	Valid: Email that consists of “@” and “.com” Example input: tanmeiling@gmail.com	System accept the email
TC035_02	Invalid m_email	Invalid: Email that does not consists of “@” or “.com” Example input: “User123.com”	System reject the email
TC036_01	Valid m_religion	Valid:	System accept the

		<p>Values from the available radio button</p> <p>1: Islam 2: Buddha 3: Hindu 4: Kristian 5: Lain-lain</p> <p>Example input: “1”</p>	religion
TC037_01	Valid m_race	<p>Valid:</p> <p>Values from the available radio button</p> <p>1: Melayu 2: Cina 3: India 4: Lain-lain</p> <p>Example input: “1”</p>	System accept the race
TC038_01	Valid m_maritalStatus	<p>Valid:</p> <p>Values from the available radio button</p> <p>1: Bujang 2: Kahwin 3: Cerai 4: Kematian Pasangan</p> <p>Example input: “1”</p>	System accept the marital status
TC039_01	Valid m_homeAddress	<p>Valid:</p> <p>Mixture of alphabets, numbers, and special characters</p> <p>Example input: “10, Jalan Ali”</p>	System accept the home address
TC040_01	Valid m_homeCity	<p>Valid:</p> <p>Alphabet</p> <p>Example input: “Ipoh”</p>	System accept the home city
TC040_02	Invalid m_homeCity	Invalid:	System reject the

		Number Example input: “123”	home city
TC040_03		Invalid: Special character Example input: “Johor @ Bahru”	
TC041_01	Valid m_homeState	Valid: Values from the available radio button 1: Johor 2: Kedah 3: Kelantan 4: Melaka 5: Negeri Sembilan 6: Pahang 7: Pulau Pinang 8: Sabah 9: Sarawak 10: Selangor 11: Terengganu 12: WP Kuala Lumpur 13: WP Labuan 14: WP Putrajaya 15: Perak 16: Perlis Example input: “1”	System accept the home state
TC042_01	Valid m_homePostcode	Valid: 5 numbers Example input: “36000”	System accept the home postcode
TC042_02	Invalid m_homePostcode	Invalid: Value consisting alphabet, number, or special characters Example input: “3@a0”	System reject the home postcode

TC043_01	Valid m_position	Valid: Alphabet Example input: “Kerani”	System accept the position
TC043_02	Valid m_positionGrade	Valid: Number Example input: “A23”	System accept the position grade
TC044_01	Valid m_officeAddress	Valid: Mixture of alphabets, numbers, and special characters Example input: “10, Jalan Ali”	System accept the office address
TC045_01	Valid m_officeCity	Valid: Alphabet Example input: “Ipoh”	System accept the office city
TC045_02	Invalid m_officeCity	Invalid: Number Example input: “123”	System reject the office city
TC045_03		Invalid: Special character Example input: “Johor @ Bahru”	
TC046_01	Valid m_officeState	Valid: Values from the available radio button 1: Johor 2: Kedah 3: Kelantan 4: Melaka 5: Negeri Sembilan 6: Pahang 7: Pulau Pinang	System accept the office state

		<p>8: Sabah 9: Sarawak 10: Selangor 11: Terengganu 12: WP Kuala Lumpur 13: WP Labuan 14: WP Putrajaya 15: Perak 16: Perlis</p> <p>Example input: “1”</p>	
TC047_01	Valid m_officePostcode	<p>Valid: 5 numbers</p> <p>Example input: “36000”</p>	System accept the office postcode
TC047_02	Invalid m_officePostcode	<p>Invalid: Value consisting alphabet, number, or special characters</p> <p>Example input: “3@a0”</p>	System reject the office postcode
TC048_01	Valid m_faxNumber	<p>Valid: Number</p> <p>Example input: “12345678901”</p>	System accept the fax number
TC048_02	Invalid m_faxNumber	<p>Invalid: Alphabet</p> <p>Example input: “abc”</p>	System reject the fax number
TC049_01	Valid m_phoneNumber	<p>Valid: Number</p> <p>Example input: “12345678901”</p>	System accept the phone number
TC049_02	Invalid m_phoneNumber	<p>Invalid: Alphabet</p>	System reject the phone number

		Example input: “abc”	
TC050_01	Valid m_homeNumber	Valid: Number Example input: “123456789”	System accept the home number
TC050_02	Invalid m_homeNumber	Invalid: Alphabet Example input: “abc”	System reject the home number
TC051_01	Valid m_monthlySalary	Valid: Positive number or decimal Example input: “3500.50”	System accept the monthly salary
TC051_02	Invalid m_monthlySalary	Invalid: Alphabet or negative number or decimal Example input: “-321a.60”	System reject the monthly salary

Case No.	Equivalence Class	Representative (BVA)	Expected Result

TC091_01	Valid p_minFixedSaving	Valid: Positive decimal Example input: “4.5”	System accept the p_minFixedSaving
TC092_02	Invalid	Invalid:	System reject the

	p_minFixedSaving	Negative decimal or alphabet Example input: “-10a.50”	p_minFixedSaving
TC093_01	Valid p_minMemberFund	Valid: Positive decimal Example input: “4.5”	System accept the p_minMemberFund
TC093_02	Invalid p_minMemberFund	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the p_minMemberFund
TC094_01	Valid p_minMemberSaving	Valid: Positive decimal Example input: “4.5”	System accept the p_minMemberSaving
TC094_02	Invalid p_minMemberSaving	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the p_minMemberSaving
TC095_01	Valid p_minOtherFees	Valid: Positive decimal Example input: “4.5”	System accept the p_minOtherFees
TC095_02	Invalid p_minOtherFees	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the p_minOtherFees
TC096_01	Valid p_minShareCapitalForLoan	Valid: Positive decimal Example input: “4.5”	System accept the p_minShareCapital ForLoan

TC096_02	Invalid p_minShareCapitalForLoan	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the p_minShareCapital ForLoan
TC097_01	Valid p_maxInstallmentPeriod	Valid: Positive decimal Example input: “4.5”	System accept the p_maxInstallmentPeriod
TC097_02	Invalid p_maxInstallmentPeriod	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the p_maxInstallmentPeriod
TC098_01	Valid p_maxAlBai	Valid: Positive decimal Example input: “4.5”	System accept the p_maxAlBai
TC098_02	Invalid p_maxAlBai	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the p_maxAlBai
TC099_01	Valid p_rateAlBai	Valid: Positive decimal Example input: “4.5”	System accept the p_rateAlBai
TC099_02	Invalid p_rateAlBai	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the p_rateAlBai
TC100_01	Valid p_maxAlInnah	Valid: Positive decimal Example input: “4.5”	System accept the p_maxAlInnah

TC100_02	Invalid p_maxAlInnah	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the p_maxAlInnah
TC101_01	Valid p_rateAlInnah	Valid: Positive decimal Example input: “4.5”	System accept the p_rateAlInnah
TC101_02	Invalid p_rateAlInnah	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the p_rateAlInnah
TC102_01	Valid p_maxBPulihKenderaan	Valid: Positive decimal Example input: “4.5”	System accept the p_maxBPulihKenderaan
TC102_02	Invalid p_maxBPulihKenderaan	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the p_maxBPulihKenderaan
TC103_01	Valid p_rateBPulihKenderaan	Valid: Positive decimal Example input: “4.5”	System accept the p_rateBPulihKenderaan
TC103_02	Invalid p_rateBPulihKenderaan	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the p_rateBPulihKenderaan
TC104_01	Valid p_maxCukaiJalanInsurans	Valid: Positive decimal Example input: “4.5”	System accept the p_maxCukaiJalanInsurans

TC104_02	Invalid p_maxCukaiJalanInsurans	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the p_maxCukaiJalanInsurans
TC105_01	Valid p_rateCukaiJalanInsurans	Valid: Positive decimal Example input: “4.5”	System accept the p_rateCukaiJalanInsurans
TC105_02	Invalid p_rateCukaiJalanInsurans	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the p_rateCukaiJalanInsurans
TC106_01	Valid p_maxKhas	Valid: Positive decimal Example input: “4.5”	System accept the p_maxKhas
TC106_02	Invalid p_maxKhas	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the p_maxKhas
TC107_01	Valid p_rateKhas	Valid: Positive decimal Example input: “4.5”	System accept the p_rateKhas
TC107_02	Invalid p_rateKhas	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the p_rateKhas
TC108_01	Valid p_maxKarnivalMusim	Valid: Positive decimal Example input: “4.5”	System accept the p_maxKarnivalMusim

TC108_02	Invalid p_maxKarnivalMusim	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the p_maxKarnivalMusim
TC109_01	Valid p_rateKarnivalMusim	Valid: Positive decimal Example input: “4.5”	System accept the p_rateKarnivalMusim
TC109_02	Invalid p_rateKarnivalMusim	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the p_rateKarnivalMusim
TC110_01	Valid p_maxAlQadrulHassan	Valid: Positive decimal Example input: “4.5”	System accept the p_maxAlQadrulHassan
TC110_02	Invalid p_maxAlQadrulHassan	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the p_maxAlQadrulHassan
TC111_01	Valid p_rateAlQadrulHassan	Valid: Positive decimal Example input: “4.5”	System accept the p_rateAlQadrulHassan
TC111_02	Invalid p_rateAlQadrulHassan	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the p_rateAlQadrulHassan
TC112_01	Valid p_salaryDeductionForSaving	Valid: Positive decimal Example input: “4.5”	System accept the p_salaryDeductionForSaving

TC112_02	Invalid p_salaryDeductionForSaving	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the p_salaryDeduction ForSaving
TC113_01	Valid p_salaryDeductionForMemberFund	Valid: Positive decimal Example input: “4.5”	System accept the p_salaryDeduction ForMemberFund
TC113027_02	Invalid p_salaryDeductionForMemberFund	Invalid: Negative decimal or alphabet Example input: “-10a.50”	System reject the p_salaryDeduction ForMemberFund

Case No.	Equivalence Class	Representative (BVA)	Expected Result
TC114_01	Valid b_name	Valid: Mixture of alphabets, numbers, and special characters Example input: “Advertisement”	System accept the b_name
TC115_01	Valid b_banner	Valid: Filetype is .png, .jpg, .jpeg Example input: “.png”	System accept the b_banner
TC115_02	Invalid b_banner	Invalid: Filetype is not .png, .jpg, .jpeg Example input: “.pdf”	System reject the b_banner

However, due to the inconvenience of contacting the client and time constraints, we are not able to get the client to have the testing conducted. The most that is done is the presentation with the client that raises certain problems so that we can conclude the discussions in several parts:

1. Wrong and changes

- System names are changed from *System KKK Digital Bersepadu* to *Sistem Koperasi Kakitangan KADA Kelantan Berhad*.

2. New functions

- Added a new payment method of Infront payment through cash alongside the payment method of salary deduction. There are only two methods in total, that is salary deduction and Infront payment.
- Added a new gateway for members to quit the membership system. A member should fill in a form to register for membership cancellation. After the cancellation of membership, the status of member will be changed to inactive.
- Added an entry to upload proof of payment or salary deduction for admin
- Added the status of pension for users. The system shall be able to show a list of possible candidates for pension. A user that fulfills the requirement of pension can choose to continue to be an active member.

3. Clarifications of requirements

- Receipt number is referred as the proof of payment
- salary recorded refers to the basic salary
- an inactive member can register to be a member again, with an entry fee of rm100.
- Loan applicant must have a minimum share of rm300 to apply for loan
- Loan guarantor must be an existing member of KKK corporate system.
- Entry fees are charged through salary deduction at a last time period of 26st of every month. Any user that is approved after 26st will start their first salary deduction in the next upcoming month.
- Interest rate of every type of loan is the same, fixed to 5% of the total loan amount.
- The maximum applicable amount of Al-bai loan is rm 20,000, depending on the basic salary of the member applying and validated by the salary slip
- Minimum Fee capital is rm 35, while users can decide a higher amount. The amount could be modified by contacting an admin.

12. UAT Reports

12.1 Objective of UAT

The purpose of this User Acceptance Testing (UAT) phase was to make sure it met with business requirements, performed as planned and was prepared for deployment into the production environment. End users carried out UAT to verify that the solution satisfies the requirements from both a functional and non-functional perspective.

12.2 UAT Scope

- Testing covers all major functional areas outlined in the project requirements document.
- The focus was on testing business-critical operations and ensuring the system's performance under expected usage scenarios.
